Collecting is a part of you.

Stamps celebrate history, coins breathe new life into the life of historical figures, and trading cards tender to our hobbies, childhood memories or favorite sports. No matter what collectable lets our heart skip a beat, collecting is so much more than merely storing items. Preserving, displaying, safekeeping are the true passion that drives us all. Leuchtturm has been committed to designing accessories for collectibles for over a century, and we will continue sharing this pasion with you.

More at leuchtturm.com

Dear Collector,

In times of artificial intelligence, analog retreats are especially valuable: reading a book, having a coffee, and devoting yourself to your stamp collection. A wonderful hobby that means passion not only for you, but for us as well. This year we are celebrating our 110th anniversary – and yet we are not stuck in the past. Because alongside the classics we all love, we also develop new products, often inspired by your ideas.

You may come across some “old acquaintances” in this catalogue. We have deliberately decided to show as many products from our range as possible again. And yet there is even more to discover: Feel free to visit our website at leuchtturm.com. There you will find additional accessories – for example for coins, banknotes and precious metals, but also for topics such as crown caps, concert tickets or trading cards. Because we firmly believe: Everyone is a collector!

Kind regards

2 euro commemorative coins: A field of collection that connects the whole of Europe

A continent in small change

Hardly any coin series reflects Europe's cultural and historical diversity so as impressively, as the 2 euro commemorative coins. The spectrum of topics ranges from architectural masterpieces and important personalities to anniversaries and social events, and invites you to rediscover Europe. Each country uses the same currency to to tell its own story – in an artistically designed miniature form.

The technical precision with which even the finest details are realised on the small surface makes the coins coveted collector's items across national borders and a must have for every budget. For many collectors, it is not only the value that counts, but also the joy of discovering new and unknown sides of Europe.

Euro coins:
In search of everyday rarities

Traveling from hand to hand, until it finds its place in the album

They accompany us in our everyday lives, disappearing into wallets or tills vending machines, yet they are worth a second look: Euro coins tell us a lot about their countries of origin, their symbolism and their self-perception.

The appeal of the complete collection is particularly attractive: all euro countries, all denominations, all years of issue – a collection that is growing and constantly evolving. For beginners and advanced collectors alike, circulation coins offer a fascinating mixture of systematic collecting with the potential for surprises – through a find from a small country or a coin with a rare year or mysterious mintmark.

Silver coins:
The precious metal with double potential

Investment and collecting passion combined in one coin

Silver has been one of the classic precious metals for centuries and convinces both investors and collectors equally today.

In addition to its function as investment value, silver benefits from strong industrial demand – for example in future technologies, electronics or the solar industry. Popular bullion coins such as Maple Leaf, Britannia or Kookaburra stand for high minting quality, worldwide acceptance and easy tradability. At the same time, selected years and special editions gain additional collector appeal through their limited mintage. In this way, silver coins combine value preservation, flexibility and the joy of extraordinary motifs in a special way.

Gold coins: Asset insurance and a prestigious field of collection

A golden era for investors in real assets

The development of the gold price in 2024 was as remarkable as it was complex: The precious metal repeatedly reached new record highs.

The main triggers were geopolitical tensions, particularly the escalation in the Middle East and the ongoing uncertainty in relations between China and the US. This was compounded by a monetary policy U-turn: after years of rising key interest rates, central banks around the world responded to a cooling economy, which further undermined confidence in paper currencies and brought gold into focus as an investment with real value.
In this environment, gold coins once again took centre stage: not only are they considered crisis-proof, but they can also be physically owned and easily traded. Whether Krugerrand, Maple Leaf or German gold coins – those who invested in 2024 were able to enjoy breathtaking growth.
And with a view to the coming years, many analysts see further potential – especially if global uncertainties continue to intensify.

Banknotes: Cultural history in pocket format

Means of payment with added value

Banknotes are more than just a means of payment – they document political upheavals, economic crises and artistic trends. From imperial Reich banknotes and emergency money from the Weimar Republic to designs from the GDR or early euro test notes: each specimen tells a story.

The fine printing techniques, artistic portraits and historical scenes make paper money a collecting field in its own right – with a steadily growing following. Notes in near mint condition are particularly sought-after, as they are considered rare contemporary testimonies in a medium that was originally intended for circulation. In an era of increasing digitalisation, banknotes preserve not only value, but also memories.

In 2015 an idea comes to life with the introduction of the first issued Euro souvenir banknote.
These banknotes are becoming more and more common in vending machines, at cash registers, ticket offices or simply sold in souvenir shops of many museums, amusement parks or tourist attractions. They are now sold in many countries and are coveted collectibles. The Euro souvenir banknotes are printed by an official printer of Euro banknotes. Consequently, they not only take advantage of using security paper, but adapt security features such as: watermark, a metal stripe in the paper, tactile relief, hologram, microprinting, see-through register, fluorescent/invisible ink, serial letters and a control number. Certain extra characteristics (especially the use of a purple colour) means they cannot be confused with genuine currency.

Coin capsules:
protection and presentation at the highest level

Systematic protection

Whether bullion coin, antique coinage or modern collector's edition – long-term value retention begins with correct storage. Professional collectors have therefore long favoured custom-fit protective solutions that not only protect against scratches, dust and moisture, but also leave the view of the object unclouded.

We offer the right solution for every format: from the classic round capsule to the established quadrum system and innovative variants such as magic capsules, which also securely hold irregularly shaped coins. Anyone who wants to build up their collection in a value-orientated way while achieving a visually appealing presentation format will find the ideal combination of functionality and aesthetics here.

Coin holder:
practical, compact, tried and tested

The perfect supporting programme for your collection

If you want to keep lots of coins safely and in an organised manner, you can use coin holders. The sturdy cardboard film with a viewing window not only offers protection against environmental influences, but also enables systematic cataloguing – for example through handwritten notes on the edge.

Whether for beginners who want to organise their first collectibles or for experienced collectors with extensive collections, frames can be stored in a space-saving manner, are easy to transport, and fit perfectly into collection boxes or albums. This turns loose individual items into an organised collection with a system.

1 AurumXpert
Precision, efficiency and highest processing quality.
With the AurumXpert we present the next generation of precious metal testing: The compact high-end device, developed and manufactured in Germany, convinces through intuitive operation, highly precise sensor technology and rapid analysis – entirely without damaging the test object. Coins and bars – from ¼ ounce to approx. 2 ounces* – are tested for their conductivity within seconds. The penetrating measurement of up to 1 mm depth enables precise analysis even through foils, blister packaging or capsules. Typical counterfeit materials such as tungsten, brass, copper or iron are reliably detected.

Your advantages at a glance
- Rapid analysis without damage
- Testing through foils, capsules and blisters
- Intuitive operation – no prior knowledge required
- Ideal for bars and coins from ¼ oz to approx. 2 oz*
- Made in Germany
- 24 months warranty

Ref. 100059 **£ 999.99**

2 Bullion Ruler
Measuring template

Measuring instruments: Precision at the highest level

Invest, but safely!

The number of high-quality coin counterfeits is increasing worldwide. Modern measuring instruments enable rapid and non-destructive testing of weight, dimensions and material properties.

Depending on the device, different measuring methods are used, for example to analyse the electrical conductivity or the density of the metal. In this way, even counterfeits that are visually barely distinguishable from the original can be detected. Whether individual collectibles or valuable investment holdings – reliable authenticity testing provides security when buying, selling and during inventory checks. The measuring instruments from Leuchtturm combine precise measurement technology with easy operation and support collectors and dealers in quickly and reliably verifying the authenticity of their coins.
