Stamp Accessories

Catalogue 2022

Max, Kurt and Axel Stürken (from left to right)

Dear collectors,

Passion and pleasure are two terms that we at LIGHTHOUSE have been pursuing for over 100 years with our high-quality accessories. More than 6,000 products now bear the LIGHTHOUSE brand name, which has become a symbol of practicality and quality. We are, therefore, pleased to present this Accessories for Philatelists catalogue, containing our extensive range of accessories for stamp enthusiasts.

We would like to draw your attention, in particular, to our extensive range of SF stamp mounts. LIGHTHOUSE, based in Geesthacht in northern Germany, has been producing stamp mounts under its own brand "Secura Falzlos" (SF) for more than 40 years. Since then, we have been continually developing our range. Discover all our products in the section on "SF stamp mounts" from page 73 onwards of our reorganised programme.

We are always on the lookout for new, original products which will make your hobby even more enjoyable. Your feedback is very important to us. Please support us with your comments, suggestions and constructive criticism and do not hesitate to contact us at **kunden@leuchtturm.com**.

Everyone needs to have a passion for something! We hope you enjoy browsing our catalogue for stamp accessories.

Use the quickfinder to find your way around the catalogue!

The accessories catalogue is subdivided into different categories. One category is “optical accessories”, for example. Every category is assigned a colour, i.e. “optical accessories” is orange. On the following pages, you will find a coloured section on the right-hand margin which indicates the colour of the respective category. This means you will be able to recognise immediately which category you are looking at. The quickfinder primarily helps you to jump to the desired accessory category, without having to look through every single page of the catalogue. Try it out!

Stockbooks and stockcards

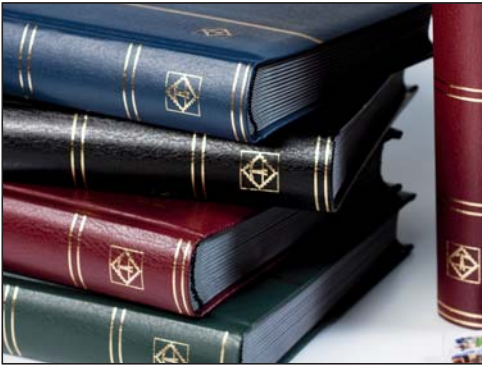

When we mention stockbooks, we refer to stamp albums with card pages featuring horizontal glassine or film strips, into which the stamps are inserted. Even if part of the collection is stored elsewhere, e.g. in illustrated albums, stockbooks can serve as storage space for duplicates, as a mobile solution e.g. for trading or to accommodate the most valuable pieces in a deposit box and are an essential piece of kit for philatelists.

On the following pages, you will find over 70 different varieties to match every taste and use. Please choose the size of your stockbook, the colour of the card, the number of pages and the material and colour of the binding.

More information about the characteristics and suitability of our sheets is available on our website at www.leuchtturm.com

Brand quality made by LIGHTHOUSE

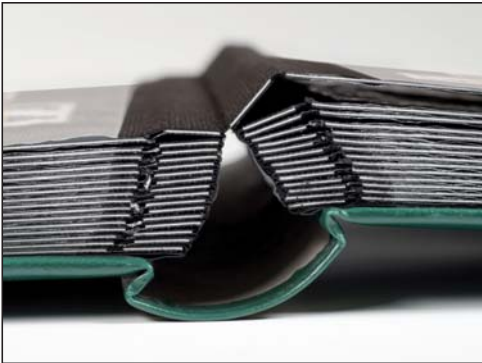

Please be aware of the subtle differences between our stockbooks when making your selection:

The **embossed gold or silver stripes** give our covers their particularly noble finish.

Double-sided interleave (glassine or clear film) guarantee optimum protection for your stamps.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

High-grammage card. Choose between white and black pages.

Heavy duty **leather*** with a leatherette cover or elegant **genuine-leather cover**. * LEFA = bonded leather material consisting of leather fibres and other sustainable natural raw materials.

Matching **slipcases** are available separately for COMFORT, COMFORT DELUXE, PREMIUM and LEATHER formats (see following pages).

LEFA = **L**eather **f**abrics (bonded leather) is a book-binding material consisting of leather fibres and other sustainable, natural raw materials (natural tanning agents, natural latex, natural fats and dyes).

By felting the leather fibres, the LEFA material has almost all the important characteristics of natural leather. No other material comes so close to natural leather in terms of quality and workmanship as LEFA.

The LEFA cover material we use is characterised by optimum physical characteristics (tensile strength, strong seams, durability, tear resistance, etc.).

INTERCEPT®-Box L180 for letters and postcards

The box with active protection against ageing and oxidation

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT® material inside. Ideal for protecting paper, coins and medallions. Suitable for postcards, letters, stockcards, documents, coin sets, etc. up to 180 x 160 mm (7 x 6 ¹/₄") in size. Overall size: 338 x 167 x 204 mm (13 ¹/₄ x 6 ⁵/₈ x 8").

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting documents and coins from ageing or tarnishing (at least 15 years guaranteed protection!*). The effect has been proven according to approved DIN, EN, ISO and ASTM standards.

15 years' protection against ageing*

* You can notice any deterioration in the effectiveness of the material if you see a dark grey to greenish discolouration of the film (not the stored items!). If this happens, you should replace the INTERCEPT® product with a new one.

Illustrated albums

Sophisticated philately requires a professional footing and attention to detail. The LIGHTHOUSE-branded illustrated albums are expertly made with great attention to detail, hence the high quality of material and manufacturing is vital.

Furthermore, LIGHTHOUSE provides the stamp collector with an entire range of philatelic accessories to satisfy all their needs. LIGHTHOUSE illustrated albums fulfil the demands of even experienced and expert philatelists with a huge selection of over 120 collection areas and editorial, philatelic compilation by our specialist editors.

To store your collection in style, we offer binders with various mechanisms in a range of designs in the same high quality. Binders featuring extremely high-quality, heavy duty covers with gold embossing have become firm favourites for collectors.

The advantages of LIGHTHOUSE illustrated albums

LIGHTHOUSE prints its album pages (size 270 x 297 mm/ 13-hole system) on non-ageing wood and acid-free card (170 g/m²) in high-resolution black and white offset print. Colour printing is consciously avoided. This allows you to immediately spot the missing stamps in your collection. SF mounts in sizes which match the stamps, made from clear, anti-glare polystyrene film, free from chemical softener are glued to the card of the albums. The mounts hold the stamps securely in place and prevent them from sticking. They also optimally protect your collection from dust and damage.

Many LIGHTHOUSE illustrated album pages are also available without SF protective covers in a “regular” version.

The individual characteristics of similar stamps which vary in e.g. colour, perforation or printing process are noted on the respective album sheets. This only applies to stamps with MICHEL (major) or Stanley Gibbons numbers and includes the year where required.

In this way we always ensure an aesthetically pleasing overall presentation.

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for your stamps using the appropriate SF mounts (100% polystyrene, free from chemical softeners and stabilisers).

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

Sheets match 4 different binder types (Springback binder, 13 ring binder, turn-bar binder and bolt binder).

LB-sheets

LB-sheets are card sheets in album format which come with a welded protective pocket. The film for our LB-sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents.

The practical LB-system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB-pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery.

The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

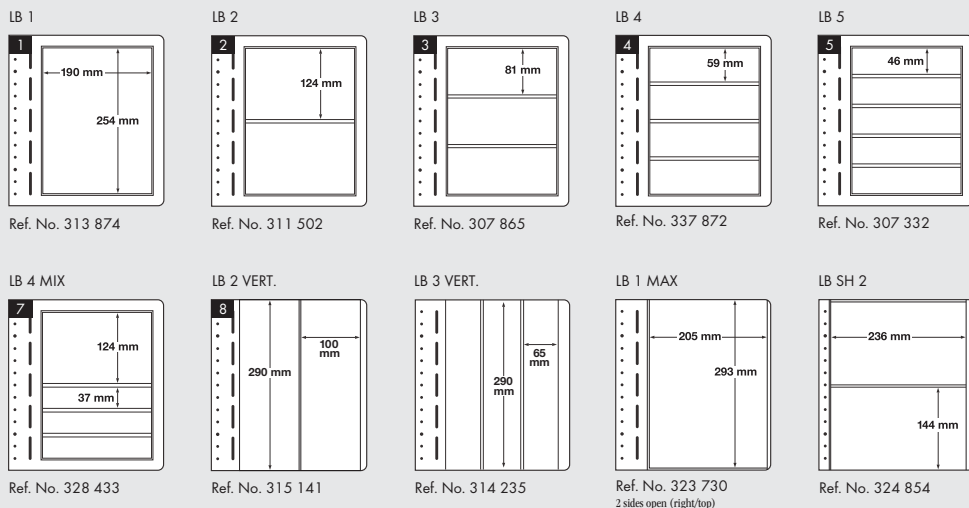

Overall size of the LB page is: 270 x 297 mm
(10 $\frac{5}{8}$ x 11 $\frac{3}{4}$ ").

SF mounts

For more than 40 years, LIGHTHOUSE, based in Geesthacht in northern Germany, has been producing stamp mounts under its own brand “Secura Falzlos” (SF). And the well-known LIGHTHOUSE SF pre-illustrated albums also come with our own stamp mounts.

The stamp mounts are made of polystyrene (PS), which is PH-neutral and does not contain chemical softeners. The extensive range of stamp mounts from LIGHTHOUSE are available with either a clear or black backing film, and there is also a selection of different versions, incl. parallel welds (closed at the top and bottom) and Doragard (closed at top and bottom, open from the back).

The current range of SF stamp mounts from LIGHTHOUSE comprises around 115 different items, including strips and block mounts and even a guillotine for cutting your mounts to the required size.

The LIGHTHOUSE range of SF stamp mounts

We stock a well thought-out and internationally coordinated range of SF* stamp mounts with clear and black backing film:

1. LIGHTHOUSE SF strips

217 mm (8 1/2") long, in various heights. The strip is 4 mm higher than the given stamp size, to give an all around margin. Cut the width to your requirements.

2. LIGHTHOUSE SF mounts for blocks

In most popular sizes. For postal stationery, blocks, mini-sheets etc. For more information, please see "The advantages of LIGHTHOUSE illustrated albums" at the beginning of the section.

Clear stamp mounts are ideal for, say, organising pre-printed (illustrated) pages. By contrast, the stamp mounts featuring a black backing film highlight the stamp's perforated edge, showcasing the actual stamp.

* SF = Secura Falzlos

3 ways to insert

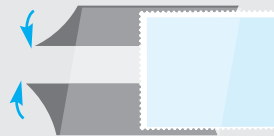

SF stamp mount:

SF stamp mount with a gummed base backing film; stamp can be inserted either from the side or from the top. Ideal for unusual stamp sizes/shapes due to the "cut-to-size" mount.

Double weld (d) = sealed at the top and bottom:

Two parallel welds and a gummed base backing film. Stamps are inserted from the side.

Doragard (D) = sealed at the top and bottom, opens at the back:

Two parallel welds and a gummed base backing film with a slit in the middle ensure that stamps stay firmly in place.

Why choose SF stamp mounts from LIGHTHOUSE?

Did you know?

Magnifiers with 2–3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

Magnifiers with 5–7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

Magnifiers with 10–20X magnification

You are now very close the Stamp Collectors ultimate piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

Folding magnifiers

Pocket folding magnifier 3X

Pocket folding magnifying glass, magnification 3X, and black, genuine leather pouch. The high-quality glass lens (diameter of lens: 40 mm/1 5/8") provides an image without distorting the edges. Highly polished metal lens frame. No sharp edges and exceptionally smooth due to the soft leather. Ideal as a portable magnifier. Overall size (closed): 83 x 57 x 16 mm (3 1/4 x 2 1/4 x 5/8").

For checking fluorescence and phosphorescence ✓

Incl. attachment with magnifying glass 3.5X ✓
Ideal as a portable magnifier! ✓

Can also be used as an inspection lamp

The LUCY ultraviolet lamp is a top-quality inspection device which provides the user with a host of tried-and-tested features as well as a number of functions.

The built-in, durable ultraviolet LED has a very broad wavelength range of 254 nm (shortwave) to 390 nm (longwave), meaning that this device is able to detect and check both fluorescence and phosphorescence. Even pen cancellations on stamps or paper repairs that have been removed can be seen using the LUCY UV lamp. Furthermore, the UV LED used is extremely powerful and provides significantly better results, e.g. phosphorescence afterglow, than other forms of light.

The UV lamp can be used both as a portable lamp as well as a fully lamp with magnification. Thanks to a special darkening attachment, the lamp also works perfectly in bright surroundings, such as in artificial light or daylight. The attachment to create a darker environment is made of two parts, whereby one section comes with a magnifying lens (3.5x magnification), in order to be able to detect details more easily. Both attachment parts can be used together or individually. Other benefits of the LUCY UV lamp include the sturdy casing made of hard plastic with rubberised, anti-slip sides, a push button for switching on and off the UV lamp and is light in weight, meaning the lamp is ideal for travelling, trade fairs and exhibitions. Battery powered (4x 1.5 V AAA batteries, not included). Overall size (excl. attachment): 145 x 85 x 25 mm (5 ³/₄ x 3 ³/₈ x 1").
